## EDUCATION

### **RMIT University, Melbourne** — *Associates Degree of Information Technology*

February 2016 - November 2017

Graduated with distinction in 2017, 3.6 GPA

I specialized in Networking obtaining my CCNA during the course. I was also exposed to many areas of IT including web programming, UNIX systems, Virtualisation and Operating Systems, and Database Concepts.

### **RMIT University, Melbourne** — *Bachelor of Software Engineering*

March 2018 - PRESENT

Thus far completed subjects involving Artificial Intelligence, Algorithms and Analysis, Discrete Structures, Security in Computing & IT, Software Architecture and Design, Advanced Programming Techniques and Professional Computing Practice.

## PROJECT EXPERIENCE

**Python AI** - Developed an [AI in Python](#) that looks at the board state of a connect four game and decides the best move to take.

**Java MVC** - Wrote the logic behind, and the front end to a randomized [betting game](#) including the use of thread management.

**C Memory leaks** Developed two C programs that involved teaching me about [programming fundamentals](#) and [memory leaks](#).

**HTML/CSS/PHP Website** - Currently working on a [personal website](#) for myself which showcases my work. As well as completed a [basic website](#) that includes website fundamentals, e.g HTML/CSS/PHP/bootstrap

**Open Source Python Project** - Worked with three other classmates that designed and added features to an [open source project](#) that we developed using Agile and Sprint planning weekly.
